Dear Chairman Melendez:

Thank you for your tribe's letter of June 3, 2021.

The consultation period for the public and Native American tribes on potential effects and resolution of those effects on historic properties from the Thacker Pass lithium project opened in January 2020 and closed November 5, 2020. Due to their proximity to the project, the Fort McDermitt Paiute Shoshone tribe, the Summit Lake Paiute tribe, and the Winnemucca Indian Colony were all invited to consult on both the project and its impacts. In August 2020, the Bureau of Land Management (BLM) reached out by letter to these tribes again for consultation on the historic properties treatment plan (HPTP). Between January and November, no party brought an issue concerning historic property eligibility, effects, and resolution of effects to the BLM's attention. The historic properties treatment plan was developed, and the Memorandum of Agreement (MOA) was signed with the Nevada State Historic Preservation Office.

Currently the BLM is only consulting on the issuance of the Archaeological Resources Protection Act (ARPA) permit as outlined in 43 CFR § 7.7. Should the tribe wish to consult on the issuance of the ARPA permit, please contact Ms. Shannon Deep at 775-623-1504 or [sdeep@blm.gov](mailto:sdeep@blm.gov).

Sincerely,

Kathleen Rehberg  
Field Manager  
Humboldt River Field Office
